

DATASHEET

DIFFERENTIAL MODE CHOKE COIL - DMC

Features:

- Compact and Cost Effective
- Rated Current up to 25A
- Coil with Different foot Print.
- Excellent Differential Mode Suppression.

Applications:

- AC / DC Electrical equipment
- Signal Lines.
- DC to DC Converters
- Medical Application

These series range of Differential mode Choke coils are designed to use in wide range of applications. The Differential Mode Choke coil is used to suppress the differential mode noise in the Equipment / System.

Technical Specifications:

Maximum Continuous Operating Voltage	: 250 VAC
Operating Frequency	: 50/60Hz
Current ratings	: 0.5A to 25A @40°C
Mounting	: Vertical / Horizontal
High Potential test voltage	: 1440Vdc
Inductance	: As per Customer Request
No. of Sides	: Single
Temperature range	: -25°C to +85° C

How to Order DMC-XXA-XXL-XXM

Mounting (V - Vertical, H - Horizontal)
